

1

Slide the device keyboard under the bottom case's left side clip.

2

Press the other side of the keyboard down to snap into the right side clip securely.

3

Slide the keyboard forward until it is flush with the front edge of the case.

4

Close the device screen and carefully press the rear corner clips to snap onto the keyboard.

5

Align the top edge of the device with the case's upper side clips. Slide the top case down until the device is flush with the top edge.

6

Press the lower side clips over the device, with pressure from both sides, to snap into place securely.

7

Close the case and press on the rear clips along the back edge of the top case. Make sure all clips are securely attached. ****Case may have a 3rd clip at the center***

CRITICAL!
FOLLOW STEPS 1 - 3 IN ORDER

Failure to do so may result in damage to the device.

1

Unhook the rear clips along the back edge of the top case. **Case may have 3rd clip at the center*

2

Push the lower left and right side clips outward to release the bottom of the top case from the device.

3

Gently slide the top case up and off the device to release it from the upper side clips.

4

Gently push the rear clips down to unhook from the device. **Closing device partially may help with this step*

5

Push the left and right side clips down past the device, one side at a time, to release the bottom case.

The PC case is recyclable if the feet and EDP (Energy Displacement Protection) are removed!
